Supplier of high quality standard & bespoke Non-Threaded Fasteners

Slotted Spring Tension Pins / Roll Pins

Here at Caleb Components, we specialise in high quality Spring Pins. These Pins can also be known as Slotted Roll Pins, Spring Tension Pins or Sellock Pins.

Slotted Spring Pins are simply a single coil of steel with an open slot, this will enable the pin to reduce its diameter, so that it can be easily inserted into the appropriate size hole. The most common form of Spring Pin is the Heavy Duty type, however Light Duty Spring Pins can also be manufactured upon request.

Heavy Duty Slotted Spring Pins	Light Duty Slotted Spring Pins
DIN 1481 / ISO 8752	DIN 7346 / ISO 13337

We can supply our Spring Pins in the following materials.

- Carbon Spring Steel
- A2 Stainless Steel
- 316 (A4) Stainless Steel
- Beryllium Copper

Most Spring Pins have a self-colour finish, however a Zinc Plated finish is also available upon request.

We cover a wide range of sizes from 1.5mm nominal diameter to 50mm and in various lengths. Special sizes are also available – please enquire with us.

To view our standard range of Heavy Duty Spring Pins, please view the table on the page below.
